

METHOD AND APPARATUS FOR CAUSING A REMOTE DEVICE TO  
IMPLEMENT A USER PROFILE AND SYSTEM THAT OPERATES THEREWITH

Abstract of the Disclosure

An electronic apparatus is disclosed. The apparatus comprises a housing that a person can carry and a circuit coupled to the housing. The circuit causes a device to operate according to a predetermined user profile of the person, wherein the device is remote from the housing and the circuit. The device can be used in a system that also includes the device that, when remote from the electronic apparatus, stores a first predetermined user profile of a first person, detects the first electronic apparatus, and operates according to the first user profile in response to detecting the electronic apparatus.
